- Area Enhancement

Producing environments that encourage learning

We work with a number of schools giving an A* service...

"The once doudy classroom has been brought to life. Annexa worked very efficiently and to schedule from initial survey to completion"

Carmelina Fugaccia - **London Academy**

"The room was being used as an elaborate store room and is now a state of the art classroom. A great job and nice people to work with"

Sylvia Kauvanagh - **Cumberland School**

"A very professional job and I found them very easy to work with. I am very pleased and I will look to use Annexa for further works"

Peter Littlemore - **Southend High School For Girls**

"We needed the corridors and common areas brightened up, it's amazing what a difference good decorating can do"

Julian Sutcliff - **Lea Valley School**

Building Schools for the Future

The Government is making strategic investments that will transform the face of learning in schools to bring them into the 21st Century. This will see almost every school in the UK rebuilt or remodelled over the lifetime of the programme.

The programme aims to create learning environments which inspire all young people to unlock hidden talents and reach their full potential; provide teachers with 21st century work places; and provide access to facilities which can be used by all members of the local community, placing schools at the heart of the community.

Annexa is actively involved in helping schools achieve their potential by providing complete fitout services and furniture for educational interiors. To find out more about how we can help, [please contact us on 0845 3011524](tel:08453011524)
