Decorating

Our products are guaranteed to bring any room to life, but we also know that the key to our products looking their best is in the way in which they are applied which is why we have a team of professionals dedicated to this service.

Blinds

Blinds are probably the most versatile solution to sun shading problems. Tones, textures and contemporary weaves as well as metal slats in a palette of colours will enhance the decor of any room in your office.

Air Conditioning & Air Handling

Air conditioning is the control of temperature, humidity, air flow and air purity. Air handling for ventilation ensures work and rest areas have adequate air flow. We carry out all of the survey, design and installation to offer a complete 'turn key' package.

Electrical & Data

Whether you require additional power outlets, trunking, under floor cabling or the design and installation of a complete electrical solution, we have a fully qualified team of engineers, covered by NIC EIC, in place to help you. Our dedicated data cabling team carry out installation work for all systems, including design, installation and testing for Cat 5, Cat 6 and Fibre Optics.

interior solutions

We would like introduce you to a small selection of the interior solutions we can offer at Annexa. The following options are all based on a 3 x 3 metre sizing to give you an idea of standard pricing available.

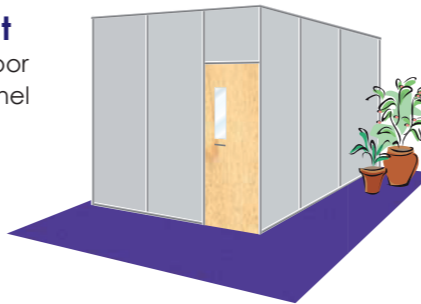

Our partitioning solutions mean that as well as traditional aluminium frames we also provide a frameless single or double glazed silicon jointed system with glass doors. Wall to wall and floor to ceiling, seamless glazing with no intrusive posts to break up the stunning looks of the partition. The partitioning includes straight or radius options.

For other services we provide please see the reverse of this leaflet
